DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

To have a general inventive concept under PCT rule 13.1, the inventions need to be linked by a special technical feature. The special technical feature that appears to link the claims is an antibody to CC2. Reference, WO 96/39541 (December 1996) disclose an antibody to SEQ ID NO:2 which comprises CC2. Therefore the technical feature recited in the claims is not a contribution over the prior art. In addition the reference teaches diagnosing gastrointestinal cancer as recited in claim 1 (see abstract, pages 3-4, 11, 14-17). Accordingly the groups set forth below are not so linked as to form a single general concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1 and 6, drawn to a method of diagnosing gastrointestinal cancer.

Group II, claim(s) 2-6 drawn to a method of diagnosing metastases of gastrointestinal cancer in a cancer patient.

Group III, claim(s) 7, drawn to an antibody.

Group IV, claim(s) 8-9, drawn to a method of imaging gastrointestinal cancer.

Group V, claim(s) 10-11, drawn to a method of treating gastrointestinal cancer.

Art Unit: 1642

2. The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: As set forth above in view of the teachings from the WO document the groups are not so linked as to form a single general concept under PCT Rule 13.1 because the technical feature shared by Groups I-V is not special.

Groups I-II, IV-V differ in the method objectives because Group I does not require a cancer patient while Groups II, IV-V do require a cancer patient. In addition, the methods require a different reagents, for example Group IV requires a labeled antibody with a radiolabel and Group V requires a conjugate of a cytotoxic agent. Thus the inventions I-V are patentably distinct.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and different classifications, restriction for examination purposes as indicated is proper.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Larry R. Helms, Ph.D., whose telephone number is (703) 306-5879. The examiner can normally be reached on Monday through Friday from 7:00 am to 4:30 pm, with alternate Fridays off. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anthony Caputa, can be reached on (703) 308-3995. Any inquiry of a general nature or relating to the status of

this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0196.

5. Papers related to this application may be submitted to Group 1600 by facsimile transmission. Papers should be faxed to Group 1600 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). The CM1 Fax Center telephone number is (703) 308-4242.

Respectfully,
Larry R. Helms Ph.D.
